

ENVIRONMENTAL AND SUSTAINABILITY POLICY

Essar Steel processing and distribution UK Limited is committed to undertaking its activities regarding the environment by meeting the requirements of ISO 14001 through our established working practices and our commitment to continual improvement. We will endeavour to comply with all environmental legislation, regulations and other requirements relating to our activities, with particular reference to:

- o MCERTS Self-Monitoring of Effluent Flow
- o MCERTS Emissions Monitoring from Emissions Point A1 (Permit KP3732PL)
- o Environmental Permitting Regulations (IPPC) Permit KP3732PL

It is our declared policy to minimise the effects of our activities through environmental and sustainable measures, which will include;

- Assess the effects of our activities on the surrounding environment.
- A purchasing policy to ensure our suppliers is as committed as we are to sustainable and environmental practices.
- Be committed to a programme of continual improvement and pollution prevention by:
 - o Limiting the amount of waste produced by raising staff awareness through our quality standards which meet ISO 9001, and where waste is produced we work closely with our staff and our fully licensed waste contractors to ensure we can re-cycle and recover as much waste as possible through the waste management hierarchy.
 - o Effectively managing the consumption of Energy and Water through a system which constantly measures our usage. Analysis of which helps to decide best practice working techniques and future improvement programmes.
- Maintain awareness of any developments designed to improve the environment and apply best available technology where viable.
- Communicate the policy to employees and interested parties through various methods including the company intranet and our website www.essar.co.uk
- Set definable and measurable Environmental Objectives and Targets.
- Train and inform all employees so as to raise awareness of environmental and sustainability matters, which includes the use of call conferencing instead of physical travel and the promotion of using bicycles or public transport.
- If requested, provide information and assistance to customers on environmental issues arising from our products and services.
